

# Statement of Purpose

Sahil Pattni  
(sp72@hw.ac.uk)

I want to pursue a Master in Computer Science, and my career aspiration is to become a data scientist. My research interests include machine learning, data structures and natural language processing.

My motivation for pursuing research relating to machine learning stems from building my own neural network from scratch and optimizing it using Particle Swarm Optimization for my Biologically Inspired Computation course. I will excel at McMaster University.
